# SWIFT◤CURRENT
## WAREHOUSE EXECUTION SYSTEM

## OPTIMIZE YOUR WAREHOUSE OPERATIONS WITH SWIFTCURRENT

The Cutting-Edge WES

# INTRODUCING SWIFTCURRENT

SRSI provides this software package to execute all your operation tasks. SwiftCurrent can be integrated into any WMS, WCS, or previously used WES. Streamlining your warehouse operations has never been easier.

**Warehouse Management**

**Order Management**

**Robotics & WCS**

**Carrier Shipping**

**Labor & Analysis**

## ROBOTICS **EXECUTION**

Integrate robotics into your warehouse without complicated, time consuming coding projects. Robots are directed in real-time by SwiftCurrent workflows, maximizing your investment. Grow, optimize and scale modularly as needed.

## ECOMMERCE **FULFILLMENT**
### Powered by SwiftCurrent Technology

**Warehouse Management**

Modular warehouse management and order fulfillment system designed for ecommerce from inbound to outbound with SwiftCurrent Process Technology.

SaaS cloud solution that can be implemented quickly with hundreds of leading features built-in for efficiency, speed and accuracy to scale your business.

**Parcel Shipping**

A configurable shipping solution that cartonizes and rate shops with leading parcel carriers.

Verifies items for shipping, weighs shipments and then prints carrier-compliant labels along with customer manifest.

**Robotics & Software Program**

Allows for muitlple robotics to be integrated into one command task processes system.
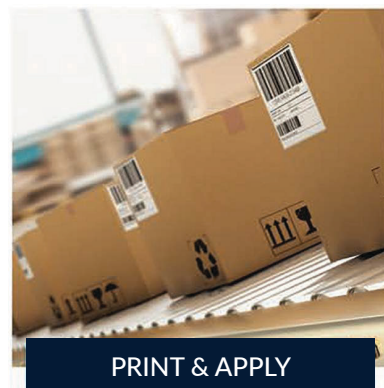

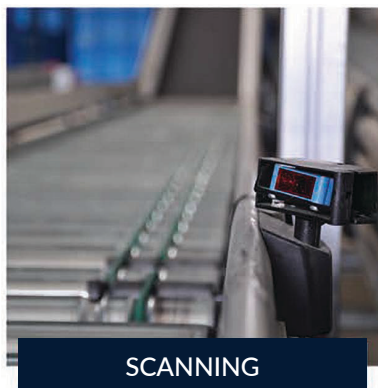

Optimizes work assignment and routing control for better resource allocation.

## MHE **EQUIPMENT WCS**

A configurable real-time software platform built into the cloud platform that orchestrates the movements and directs flow via our routing logic. Add other components such as scanners, print and apply, scales, and PTL lights as part of the solution.

# ADVANCED SOFTWARE CAPABILITIES

In order to get the most out of your Material Handling Equipment (MHE) investments, we've coupled advanced software capabilities beyond traditional solutions. SRSI tailors the software integration process to meet specific business requirements without complicated coding projects. Mix and match modules for various functions with any system solution. Your ROIs will speak for themselves:

| LOWER LABOR | > | MHE CONTROLS | > | FULFILLMENTS SPEED | > | REDUCED ERRORS |
